VEB Industrial Plant, Dresden

VEB Industrial Plant, Karl-Marx-Stadt

VEB Aircraft Plant (apparatus, gliders), Lommatsch

Personnel Strength

The number of people employed by the Office for Technology, excluding Main Administration III, comprises about 220 persons. It must be taken into account that not all posts allotted under the plan have been filled, because of a lack of qualified personnel.

II. OPERATIONS

Functions

In addition to production, the Office for Technology is responsible for launching research and development projects for special equipment for all military organizations of East Germany, namely: the National People's Army, police units of the Ministry of the Interior, police units of the Ministry for State Security, the German Red Cross, and the Society for Sport and Technology.

50X1-HUM

Procedures

Needs are determined and orders placed by the procurement offices of the various armed services, such as the National People's Army, police units of the Ministry of the Interior, police units of the Ministry for State Security, etc. Requirements are compiled and co-ordinated with the Economic Plan by the State Planning Commission, Main Department I. After being authorized, each requirement is listed under "Order Number 88 000, Special Requirement I...". Main Department I of the State Planning Commission notifies the Office for Technology of the total requirements for each industrial product. The Office for Technology is responsible for scheduling production in the plants subordinate to it. The remaining production capacity of the plants is devoted to civilian needs. Heinrich Slatosch [redacted] is director of Main Department I in the State Planning Commission. He is to be replaced by Major General Freyer [redacted] who is from Strausberg.

50X1-HUM

50X1-HUM

Department I of the Finance Ministry, under the direction of Colonel Lindner [redacted] is responsible for financing.

50X1-HUM

It has been found that personnel of the Office for Technology are fully occupied with the solution of production problems. For this reason, research and developmental work has not made satisfactory progress. Army officers responsible for research and development have also been unable to find satisfactory solutions to problems referred to them. Therefore, in the future, the Office for Technology is to relinquish production problems to the industrial ministries and is to concern itself solely with research and development to meet special requirements. The re-organization is to begin 1 July 1957.

Allocation of Contracts and Payment for Services Rendered

Individual consumers, such as the National People's Army, police units of the Ministry of the Interior and the Ministry for State Security, allot contracts, after consultation with the Office for Technology, directly to individual plants. Goods and services received are paid for by the consumers themselves.

Production Results Achieved by Administration for Clothing and Equipment in Main Administration I

Gross production for the year, 1956 amounted to 180 million DM. Of this amount, 120 million DM were devoted to production of equipment for military personnel. The remaining 20 million DM was used for the production of civilian suits. Dress uniforms valued at 126,000 DM and overcoats of like value were produced.

The Quality Cloth Factory at Finsterwalde and the Leipzig Clothing Factory at Leipzig have not been scheduled for special production in 1957.

The 1957 gross production of the five remaining plants under the Administration for Clothing and Equipment amounted to 95 million DM, of which 80 million DM were used for production of equipment for personnel. Among other things, 91,000 service uniforms were produced for the National People's Army. These uniforms bore the following Officer Rank Insignias:

1. Shoulder-board	1 Star	Junior Lieutenant (Unterleutnant)
"	2 Stars	Lieutenant
"	3 Stars	Senior Lieutenant (Oberleutnant)
"	4 Stars	Captain
2. Braid	1 Star	Major
"	2 Stars	Lieutenant Colonel
"	3 Stars	Colonel
